EXPERIENCE

- Through SCAD Collaborations courses with The Mill and PowerHouse VFX, I worked with my teammates on everything from story building to the final renders. For both projects, I was responsible for cinematography and visual effects, since I have a filmmaking background.
- As a Script Supervisor on feature films in China and Hong Kong, I learned to communicate between different departments and understand how a film is created from script to post-production. I also gained invaluable creative insight working side by side with feature film director
